January 5, 1998

The following are notes from the site visit to the residence of Mr. Frank Wilkie. Mr. Wilkie's property adjoins the Jackson County (County) landfill property along the ridgeline northeast of the landfill. Mr. Wilkie's potable water supply well is approximately 350 feet from the landfill property line. A sample from his well was taken during the visit and submitted to the State Health Lab for analysis. The analytical data is expected to be available in approximately a month. Mr. Wilkie requested a copy of the data upon receipt.

Mr. Wilkie stated that he had always lived on the property and since the town of Sylva began dumping waste at the site the blowing paper, odors and the presence of wild dogs had gotten progressively worse.

Mr. Wilkie's concerns were as follows:

- The landfill gas vent at the landfill will continue to be a source of odors. Can a flare be installed to burn off the gas?
- Will the landfill continue to be a potential threat to his drinking water?
- Will the County have his well sampled and tested on a regular basis to insure the landfill is not affecting his water quality?

I told Mr. Wilkie there are issues he needed to discuss with the Co. first. If he still had concerns, he was informed to call me or Jim Patterson. He agreed he would talk to the Co. first.
